—It will be good on editor-
ials, by Legislators, Congress-

State Commerce Law, as much as
it prohibits "free passage" of
goods. The laws have often set
forth that the different states through-
out the country are issuing circulars
notifying the State of Missouri that
they had passed a compulsory education
bill. This is what a great many
of the other States need and then
offers to see that the law is strictly
executed.

THE HICKMAN COURIER.

THE TEXAS DEBTOUT BILL.

President Cleveland has vetoed a bill appropriating ten thousand dollars to buy bonds for the Texas debtout. The following facts in this bill is now made that no Republican President would have vetoed such a noble measure as a debtout. It is true that no Republican President would have vetoed such a bill, but it is also true that no President is of the kind that is fit to sit. Where will the burdens of taxation end if the Government does not lay down its arms? In some instances, it is an anti-slavery principle for which the people may be taxed. The Democratic party respects the state's right to decide that the people should only be taxed for the necessary and legitimate expenses of government. The Republicans have ignored the state's right so long that many people have learned to look to the United States Treasury to help them keep their tax-free charities. These are, many thousands and thousands of noble charities throughout the country, just as there are many thousands of droughs under, that if recognized as a proper Government rule, there will be no end to such expenses. The Republicans have no right to tax the people for what they do as unequally, one community doing more than another, or perhaps more than the people need get something. Such unequal conditions of communities should be helped by individuals and communities, not by the Treasury. The Federal treasury teaches that the Federal treasury must not be used as a National alms house. We hold that the people have a right to make such appropriations that they operate unequally, and as a rule have had a教育 against individual communities. Those who remember the appropriation by Congress to the flood sufferers at Hickman, will best witness that it is accomplished little or good.

DO WE REALLY WANT ECONOMY?

It is questionable if the people really want economy in their Government or not; if they really want a reduction of taxation. The question is, is that President Cleveland's administration is being conducted so as to save to the taxpayers, and millions of dollars, but in truth, it is a question if even his own party approves his plan of economy, as they say nothing of his plan, and nothing of his party's plan. It is a question if the people, as well as the Republicen cause, do not really prefer greater grandeur in their Government even if they have to pay for it. The people, both Republicans and Democrats, know and admit that Cleveland's course is bound to result in a reduction of taxes, that the people are bound to suffer, and the people have been used to it so many years, that the great majority of the tax and heads of the state and heads of the pride and glories of gigantic appropriations of money to great enterprises, and the great and patriotic spirit of a great and patriotic spirit will be great for the greater body of people.

The Congress doubts if the American people really want an economical administration of public affairs, but rather of the wealthier classes, and millions of dollars, but in truth, it is a question if even his own party approves his plan of economy, as they say nothing of his plan, and nothing of his party's plan.

WE ARE URGENTLY NEEDED.

A few conspicuous journals are urging Congress to go slow in adding to the present burden on the country, and to wait for the following year. It is called "the year of the Texan."
